EDUCATION

Universität Erlangen-Nürnberg
Master's, Artificial Intelligence

April 2024 - April 2026

University of the Punjab
Bachelor's, Information Technology

July 2018 - July 2022
GPA: 3.44

PROFESSIONAL EXPERIENCE

Zertificon **Berlin, Germany**
Werking Student *December 2024 - Present*

- Operate & monitor the secure mail pipeline – help keep our TLS, S/MIME / PGP gateways running smoothly.
- Renew expiring X.509 certs, rotate keys, and push new cipher-suite settings to staging and production.
- Build minimal test cases for product teams and validate them in a sandbox before rollout.

Careem **Lahore, PB, Pakistan**
Software Engineer *December 2023 - April 2024*

- Developed a scalable REST microservice for the Careem Super App, leveraging Vector Postgres for efficient data management and implemented JWT-based OAuth for secure user authentication
- Ensuring continuous operation with health check services like Grafana for monitoring, Kibana for logging, and Jaeger for tracing requests using OpenTelemetry.
- Managed CI/CD pipelines using GitHub Actions, deploying dockerized service on AWS server.
- Optimized prompt engineering to enhance accuracy of results with large language models (LLMs) like GPT.

i2c Inc **Lahore, PB, Pakistan**
Software Engineer *July 2022 - December 2023*

- Pioneered the shift to a event-driven microservices architecture using Maven Spring Boot, significantly boosting system scalability and reducing maintenance overhead.
- Integrated Kafka for efficient transaction handling, enhancing throughput and reducing latency.
- Enforced rigorous testing for software reliability and performance, automating tests with bash scripts.
- Streamlined application deployment and management using Docker, reducing deployment time and optimized server resource utilization, which enabled faster delivery of software solutions.
- Deployed automated testing scripts with UFT, reducing testing time and increasing test coverage by, ensuring thorough testing of critical functionalities.
- Demonstrated expertise in ISO 8583 standards, ensuring compliance with industry regulations, safeguarding sensitive data, and fostering strong client confidence.

InfoTech Private Limited **Lahore, PB, Pakistan**
Intern *July 2021 - September 2021*

- Spearheaded backend development using Java and JavaFX, improving application performance through optimized code structure and efficient resource management.
- Reduced processing time for critical operations by utilizing advanced algorithms and data structures, enhancing software responsiveness.
- Facilitated seamless collaboration between development and SQA teams, improving bug resolution times and significantly reducing post-release defects.

CERTIFICATIONS

Machine Learning - Achieved from LinkedIn
Java - Acheived 4-Star rating on HackerRank
Problem - Solving Acheived 4-Star rating on HackerRank
Google - Code Jam Participated in Google Coding Jam Competitions
SQL - Acheived 4-Star rating on HackerRank

SKILLS

Skills: Git, HTML/CSS, Java, Python, React.js, FastAPI, Spring, spring boot, JavaFX, Docker, AWS, Kubernetes, Apache Kafka, MySQL, InformixDB, Postgres, Linux/Unix, JavaScript, C/C++, Data Structures & Algorithms

Languages: German
