

Muhammad Hassan Chattha

Software Engineer · Master's student in Artificial Intelligence

Nuremberg, Germany | Contact: my-resume-pied-tau.vercel.app/contact | LinkedIn | GitHub

EXPERIENCE

Working Student, Zertificon Berlin, Germany	Dec 2024 – present
- Operate and monitor the secure mail pipeline, keeping the TLS, S/MIME and PGP gateways running smoothly. - Renew expiring X.509 certificates, rotate keys and roll out new cipher-suite settings to staging and production. - Build minimal test cases for product teams and validate them in a sandbox before rollout.	
Software Engineer, Careem Lahore, Pakistan	Dec 2023 – Apr 2024
- Developed a scalable REST microservice for the Careem Super App, using vector Postgres for efficient data management and JWT-based OAuth for secure authentication. - Kept the service running reliably with Grafana for monitoring, Kibana for logging and Jaeger for request tracing with OpenTelemetry. - Managed CI/CD pipelines with GitHub Actions, deploying the dockerised service on AWS. - Refined prompts to improve the accuracy of results from large language models such as GPT.	
Software Engineer, i2c Inc Lahore, Pakistan	Jul 2022 – Dec 2023
- Led the shift to an event-driven microservices architecture with Spring Boot and Maven, improving scalability and reducing maintenance overhead. - Integrated Kafka for transaction handling, increasing throughput and reducing latency. - Introduced rigorous reliability and performance testing, automated with Bash scripts. - Streamlined deployment with Docker, reducing deployment time and server resource use, which enabled faster delivery. - Automated testing with UFT scripts, reducing testing time and increasing test coverage of critical functions. - Worked with the ISO 8583 standard, ensuring compliance with industry regulations and protecting sensitive data.	
Intern, InfoTech Private Limited Lahore, Pakistan	Jul 2021 – Sep 2021
- Developed backend features in Java and JavaFX, improving performance through better code structure and resource management. - Reduced processing time for critical operations with suitable algorithms and data structures. - Worked closely with the SQA team, speeding up bug fixes and reducing post-release defects.	

EDUCATION

Master's, Artificial Intelligence Friedrich-Alexander-Universität Erlangen-Nürnberg	Apr 2024 – present
Bachelor's, Information Technology University of the Punjab · GPA 3.44	Jul 2018 – Jul 2022

SKILLS

Java · Python · C/C++ · JavaScript · Spring Boot · FastAPI · React.js · JavaFX · Apache Kafka · Docker · Kubernetes · AWS · Postgres · MySQL · InformixDB · Linux/Unix · Git · HTML/CSS · Data Structures & Algorithms

CERTIFICATIONS

Machine Learning Achieved from LinkedIn
Java Achieved 4-Star rating on HackerRank
Problem Solving Achieved 4-Star rating on HackerRank
SQL Achieved 4-Star rating on HackerRank
Google Code Jam Participated in Google Code Jam competitions

LANGUAGES

English C1
German A2
